HEILA
ENGINEERED FOR THE SEA

COMPANY
PROFILE

1. ABOUT US

Heila Cranes: Power, Passion, Partnership.

For over 47 years, we have been designing and manufacturing top-quality marine and offshore cranes, recognized worldwide for their reliability, compactness, and ability to adapt to any operational requirement.

With more than **4,500 cranes installed** and certifications from major international classification societies, our expertise covers the full range of foldable telescopic cranes — from the most compact units for small vessels to heavy-duty models for subsea and offshore operations.

Every Heila product is the result of:

- **In-house full engineering by 3D modelling and FEA analysis by using ANSYS**
- **Optimized production processes for fast delivery**
- **Compact and lightweight design for maximum performance in limited spaces**
- **Advanced anti-corrosion treatments ensuring long life in extreme marine conditions**

2. MISSION & VISION

To supply the most reliable cranes to the marine and offshore industry, delivering the most suitable solution for every customer need.

To be the global benchmark for innovation, specialization, and reliability in foldable telescopic cranes, taking marine operations to a new level of efficiency and safety.

VALUES

- **RELIABILITY** – Consistent performance in any condition
- **SPECIALIZATION** – Focus on the specific needs of the marine sector
- **LEADERSHIP** – Continuous innovation and pioneering solutions

3. OUR RANGE

Experts in Foldable Telescopic Cranes

- **HLM Series** – Fully foldable cranes with rack-and-pinion slewing, ideal for compact vessels, workboats, tugs, and pontoons.
- **HLRM Series** – Foldable telescopic cranes with slewing bearing and continuous rotation, suitable for offshore and subsea operations, up to 1,500 tm.
- **HR Series** – Knuckle boom cranes for versatile, high-performance applications for SUBSEA operation fitted with AHC, AOPS and MOPS
- **Custom Solutions** – From luxury yacht cranes to Arctic- and ATEX-rated models, dredging cranes, and special manipulators for cement and bulk handling.

4. TECHNOLOGY & INNOVATION

Protection & Durability

All Heila cranes feature the **Heila Anti-Corrosion Program**, with the optional **HD4+ package** for extreme marine environments.

ADVANCED SYSTEMS

- **AHC** (Active Heave Compensation) for subsea and ship to ship operations
- **AOPS/MOPS** overload protection systems
- **Constant Tension** and personnel lifting winches
- Compliance with **Ship Classification Registers** and EN 13852-1 for offshore application
- **Low-temperature and Arctic operation packages**

CUSTOMIZATION

Wide range of accessories and coatings, including NORSOK M-501 compliant finishes and flame-spray metallization.

5. MARKETS & APPLICATIONS

Heila cranes operate worldwide in sectors such as:

- **MULTICAT, TUG and WORK BOATS**
- **Subsea and deep-water**
- **Yacht support and superyachts**
- **Navy and Coast Guard**
- **Fishing and Aquaculture**
- **Oceanographic research**
- **Dredging and port works**
- **Offshore Oil & Gas and Wind**

6. GLOBAL SERVICES

Support Anywhere

Through an international service network, we provide technical support, installation, commissioning, repairs, remote assistance and original spare parts — ensuring cranes stay operational in any sea condition.

REFURBISHMENT PROGRAM

- Complete Crane overhauling
- New anti-corrosion treatments
- Extended operational life
- New warranty coverage

7. KEY FIGURES

47+

years of
experience

4.500+

cranes
produced

3.300+

foldable telescopic
cranes delivered

360+

cranes certified by
major classification
societies worldwide
only in the last 8
years.

Global presence with headquarters in Italy, branch in The Netherlands,
and authorized dealers worldwide
